

FirstClass Mail Client vs. FirstClass Webmail

When starting at <http://fc.cantonma.org>, you have two options:

1. Download the FirstClass Client
2. Login to your FirstClass Account (webmail)

Download The Client:

Downloading the client adds the FirstClass Icon to your desktop. The Client provides a "cleaner" interface (look and feel) for you to use. The screen is less cluttered and easier to navigate. In addition, the client is generally faster to utilize than the webmail version. For daily use in your classroom, office, and at home, we recommend the client on your desktop.

FirstClass.Ink

Webmail Login:

Following the link to the webmail login, will place you at a webmail login screen. Simply enter your USERNAME and PASSWORD and you will be admitted into the webmail version of FirstClass. The functionality is the exact same, however you will notice the interface looks slightly different.

For daily use, we recommend you use the Client. When traveling, we recommend you utilize the webmail version. Both interact in real time together, providing the exact same address book, staff directory, and maintaining all of your messages regardless of which method you use.
