Use disposable gloves
 Wash hands thoroughly
with warm water and soap

Dispose of waste in an unlined waste container
 Contact the school nurse and custodian

9. You should complete the "Employee's Report of Injury" form if you have been exposed to blood borne pathogens.

True

False

10. A person with a blood borne pathogen will always look sick.

True

False

What would you do?????? Circle the correct response.

A student, Angie, comes to you with a bloody nose. She is upset and needs your assistance cleaning up. Would you:

- A. Tell Angie that you are busy and send her off to class
- B. Rush to help Angie and do your best not to touch the blood
- C. Encourage Angie to clean herself up, even though she is upset
- D. Call Angie's parents and tell them they need to come to clean her up

You notice that Angie has dripped blood down the hall. Would you:

- A. Grab some paper towels and quickly wipe up the blood
- B. Call your custodian and ask them to clean up the blood and disinfect the area using the appropriate precautions
- C. Give Angie paper towels and instruct her to clean up after herself

Angie says she is becoming nauseous from the taste of blood in her throat and then vomits on a class mate as well as the floor surrounding the waste basket. Note what order you would intervene:

- A. Call your custodian and ask them to clean up the vomit
- B. Grab some paper towels and place over the vomit
- C. Wash your hands
- D. Calm the ill student
- E. Call the nurse
- F. Disinfect the area using the appropriate precautions
- G. Calm the soiled student
