

First estimate and then use your full-circle protractor to measure each angle.

1. This angle is \_\_\_\_\_ ( $>$ ,  $<$ )  $90^\circ$ .

$\angle G$ : \_\_\_\_\_

2. This angle is \_\_\_\_\_ ( $>$ ,  $<$ )  $90^\circ$ .

$\angle H$ : \_\_\_\_\_

3. This angle is \_\_\_\_\_ ( $>$ ,  $<$ )  $90^\circ$ .

$\angle I$ : \_\_\_\_\_

4. This angle is \_\_\_\_\_ ( $>$ ,  $<$ )  $90^\circ$ .

$\angle J$ : \_\_\_\_\_

### Try This

5. On the back of this page, draw and label angles with the following degree measures:

$\angle ABC \ 78^\circ$

$\angle DEF \ 145^\circ$

$\angle GHI \ 213^\circ$

$\angle JKL \ 331^\circ$

### Practice

6. \_\_\_\_\_ =  $96 \div 4$

7.  $66 \div 8 =$  \_\_\_\_\_

8. \_\_\_\_\_ =  $314 \div 2$

9.  $928 \div 5 =$  \_\_\_\_\_
