DLCS Standards

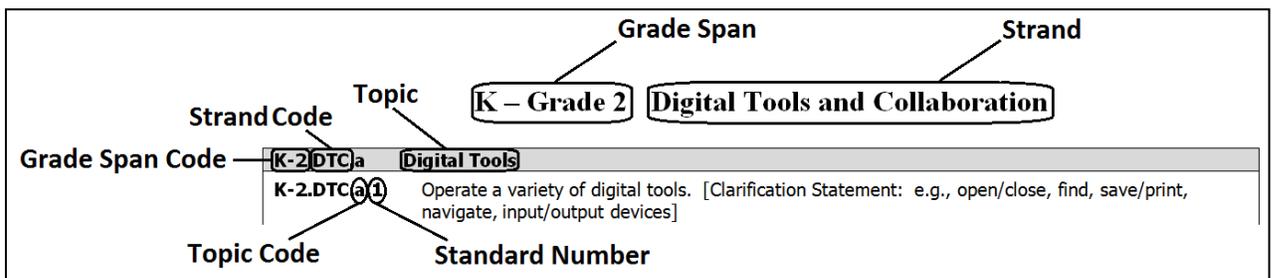

The coding system used for the standards identifies the strand and topic of the standard.

Grade Codes:	
Kindergarten to Grade 2	K-2
Grades 3 to 5	3-5
Grades 6 to 8	6-8
Grades 9 to 12	9-12

Strand Codes:	
Computing and Society	CAS
Digital Tools and Collaboration	DTC
Computing Systems	CS
Computational Thinking	CT

Topic Codes:
Topic codes are the letter of the topic.

Standard Number:
The Standard number is the numerical order of the standard as presented; the order does not imply teaching order.

Grades 3 to 5

Upper elementary students learn to differentiate tasks that are best done by computing systems or digital tools and those best done by humans. Students explore a variety of computing devices and digital tools and further develop their computational thinking problem solving skills. As students progress through grades 3–5, they begin to evaluate the uses and limitations of existing artifacts and modify parts of existing artifacts to develop something new. Students are able to describe and document their computational work in writing, using presentation tools and through demonstrations of their work.

Grade 3 to 5 standards integrate all seven practices. Standards in this grade span ask students to demonstrate the ability to:

Computing and Society (CAS)

- Understand safety and security concepts, safe and appropriate use of technology, and how to deal with cyberbullying.
- Demonstrate responsible use of technology, digital content, and interactions.
- Observe and describe how technology can influence people.
- Basic understanding of digital media messaging and equity of access to technology.

Digital Tools and Collaboration (DTC)

- Use digital tools and keyboarding skills to publish multimedia artifacts.
- Use digital tools to communicate or exchange information.
- Develop intermediate research skills to create artifacts and attribute credit.

Computing Systems (CS)

- Understand different computing devices and their components.
- Use different computing devices and troubleshoot and solve simple problems.
- Differentiate tasks that are best done by computing systems and humans.
- Understand the components of a network and basic network authentication.
- Basic understanding of services.

Computational Thinking (CT)

- Create a new representation and breakdown a larger problem into sub problems.
- Write, debug, and analyze an algorithm.
- Understand databases and organizing and transforming data.
- Write, debug, and correct programs using successively sophisticated techniques.
- Create a model and use data from a simulation.

With increased maturity, students in third through fifth grade are able to engage in learning in ways that are both more systematic and creative. Upper elementary is a critical time to engage students in the DLCS practices. Students' capabilities as creators and problem solvers build on their experiences in K–2. They continue to develop concepts through exploration, discovery, and creativity with the guidance, support, and encouragement of their educator. Standards for this grade span allow teacher flexibility in deciding when students are ready to use technology.

Grades 3 – 5: Computing and Society (CAS)

3-5.CAS.a Safety and Security	
3-5.CAS.a.1	Describe how to use proper ergonomics (e.g., body position, lighting, positioning of equipment, taking breaks) when using devices.
3-5.CAS.a.2	Describe the threats to safe and efficient use of devices (e.g., SPAM, spyware, phishing, viruses) associated with various forms of technology use (e.g., downloading and executing software programs, following hyperlinks, opening files).
3-5.CAS.a.3	Identify appropriate and inappropriate uses of technology when posting to social media, sending e-mail or texts, and browsing the Internet.
3-5.CAS.a.4	Explain the proper use and operation of security technologies (e.g., passwords, virus protection software, spam filters, popup blockers, cookies).
3-5.CAS.a.5	Describe ways to employ safe practices and avoid the potential risks/dangers associated with various forms of online communications, downloads, linking, Internet purchases, advertisements, and inappropriate content within constrained environments.
3-5.CAS.a.6	Identify different types of cyberbullying (e.g., harassment, flaming, excluding people, outing, and impersonation).
3-5.CAS.a.7	Explain that if you encounter cyberbullying or other inappropriate content, you should immediately tell a responsible adult (e.g., teacher, parent).
3-5.CAS.b Ethics and Laws	
3-5.CAS.b.1	Demonstrate responsible use of computers, peripheral devices, and resources as outlined in school rules (Acceptable Use Policy [AUP]).
3-5.CAS.b.2	Describe the difference between digital artifacts that are open or free and those that are protected by copyright.
3-5.CAS.b.3	Explain the guidelines for the fair use of downloading, sharing, or modifying of digital artifacts.
3-5.CAS.b.4	Describe the purpose of copyright and the possible consequences for inappropriate use of digital artifacts that are protected by copyright.
3-5.CAS.b.5	Explain that laws exist (e.g., Section 508, Telecommunication Act of 1996) that help ensure that people with disabilities can access electronic and information technology.
3-5.CAS.c Interpersonal and Societal Impact	
3-5.CAS.c.1	Explain the different forms of web advertising (e.g., search ads, pay-per-click ads, banner ads, targeted ads, in-game ads, e-mail ads).
3-5.CAS.c.2	Explain why websites, digital resources, and artifacts may include advertisements and collect personal information.
3-5.CAS.c.3	Define the digital divide as unequal access to technology on the basis of differences, such as income, education, age, and geographic location.
3-5.CAS.c.4	Use critical thinking to explain how access to technology helps empower individuals and groups (e.g., gives them access to information, the ability to communicate with others around the world, allows them to buy and sell things).
3-5.CAS.c.5	Identify resources in the community that can give people access to technology (e.g., libraries, community centers, education programs, schools, hardware/software donation programs).
3-5.CAS.c.6	Identify ways in which people with disabilities access and use technology (e.g., audio players and recorders, FM listening systems, magnifiers).
3-5.CAS.c.7	Identify the impact of social media and cyberbullying on individuals, families, and society.

Grades 3 – 5: Digital Tools and Collaboration (DTC)

3-5.DTC.a	Digital Tools
3-5.DTC.a.1	Type five words-per-minute times grade level (e.g., for Grade 5, type 25 words/minute).
3-5.DTC.a.2	Navigate between local, networked, or online/cloud environments and transfer files between each (upload/download).
3-5.DTC.a.3	Use digital tools (local and online) to manipulate and publish multimedia artifacts.
3-5.DTC.b	Collaboration and Communication
3-5.DTC.b.1	Communicate key ideas and details individually or collaboratively in a way that informs, persuades, and/or entertains using digital tools and media-rich resources.
3-5.DTC.b.2	Collaborate through online digital tools under teacher supervision.
3-5.DTC.c	Research
3-5.DTC.c.1	Identify digital information sources to answer research questions (e.g., online library catalog, online encyclopedias, databases, websites).
3-5.DTC.c.2	Perform searches to locate information using two or more key words and techniques to refine and limit such searches.
3-5.DTC.c.3	Evaluate digital sources for accuracy, relevancy, and appropriateness.
3-5.DTC.c.4	Gather and organize information from digital sources by quoting, paraphrasing, and/or summarizing.
3-5.DTC.c.5	Create an artifact that answers a research question and clearly communicates thoughts and ideas.
3-5.DTC.c.6	Cite text-based sources using a school- or district-adopted format.
3-5.DTC.c.7	Provide basic source information (e.g., Uniform Resource Locator [URL], date accessed) for non-text-based sources (e.g., images, audio, video).

Grades 3 – 5: Computing Systems (CS)

3-5.CS.a	Computing Devices
3-5.CS.a.1	Identify a broad range of computing devices (e.g., computers, smart phones, tablets, robots, e-textiles) and appropriate uses for them.
3-5.CS.a.2	Describe the function and purpose of various input and output devices (e.g., monitor, keyboard, speakers, controller, probes, sensors, Bluetooth transmitters, synthesizers).
3-5.CS.a.3	Demonstrate an appropriate level of proficiency (connect and record data, print, send command, connect to Internet, search) in using a range of computing devices (e.g., probes, sensors, printers, robots, computers).
3-5.CS.a.4	Identify and solve simple hardware and software problems that may occur during everyday use (e.g., power, connections, application window or toolbar).
3-5.CS.a.5	Describe the differences between hardware and software.
3-5.CS.a.6	Identify and explain that some computing functions are always active (e.g., locations function on smart phones).
3-5.CS.b	Human and Computer Partnerships
3-5.CS.b.1	Compare and contrast human and computer performance on similar tasks (e.g., sorting alphabetically, finding a path across a cluttered room) to understand which is best suited to the task.
3-5.CS.b.2	Explain how hardware and applications (e.g., Global Positioning System [GPS] navigation for driving directions, text-to-speech translation, language translation) can enable everyone, including people with disabilities, to do things they could not do otherwise.
3-5.CS.b.3	Explain advantages and limitations of technology (e.g., a spell-checker can check thousands of words faster than a human could look them up, however, a spell-checker might not know whether ‘underserved’ is correct or if the author’s intent was to type ‘undeserved’).
3-5.CS.c	Networks
3-5.CS.c.1	Describe how a network is made up of a variety of components and identify the common components (e.g., links, nodes, networking devices).
3-5.CS.c.2	Describe the need for authentication of users and devices as it relates to access permissions, privacy, and security.
3-5.CS.c.3	Define and explain why devices are numbered/labeled in networks (e.g., the World Wide Web Uniform Resource Locator [URL], the Internet Protocol [IP] address, the Machine Access Code [MAC]).
3-5.CS.c.4	Recognize that there are many sources of and means for accessing information within a network (e.g., websites, e-mail protocols, search engines)
3-5.CS.d	Services
3-5.CS.d.1	Identify common services (e.g., driving directions apps that access remote map services, digital personal assistants that access remote information services).

Grades 3 – 5: Computational Thinking (CT)

3-5.CT.a	Abstraction
3-5.CT.a.1	Use numbers or letters to represent information in another form (e.g., secret codes, Roman numerals, abbreviations).
3-5.CT.a.2	Organize information in different ways to make it more useful/relevant (e.g., sorting, tables).
3-5.CT.a.3	Make a list of sub-problems to consider, while addressing a larger problem.
3-5.CT.b	Algorithms
3-5.CT.b.1	Define an algorithm as a sequence of instructions that can be processed by a computer.
3-5.CT.b.2	Recognize that different solutions exist for the same problem (or sub-problem).
3-5.CT.b.3	Use logical reasoning to predict outcomes of an algorithm.
3-5.CT.b.4	Individually and collaboratively create an algorithm to solve a problem (e.g., move a character/robot/person through a maze).
3-5.CT.b.5	Detect and correct logical errors in various algorithms (e.g., written, mapped, live action, or digital).
3-5.CT.c	Data
3-5.CT.c.1	Describe examples of databases from everyday life (e.g., library catalogs, school records, telephone directories, contact lists).
3-5.CT.c.2	Collect and manipulate data to answer a question using a variety of computing methods (e.g., sorting, totaling, averaging) and tools (such as a spreadsheet) to collect, organize, graph, and analyze data.
3-5.CT.d	Programming and Development
3-5.CT.d.1	Individually and collaboratively create, test, and modify a program in a graphical environment (e.g., block-based visual programming language).
3-5.CT.d.2	Use arithmetic operators, conditionals, and repetition in programs.
3-5.CT.d.3	Use interactive debugging to detect and correct simple program errors.
3-5.CT.d.4	Recognize that programs need known starting values (e.g., set initial score to zero in a game).
3-5.CT.e	Modeling and Simulation
3-5.CT.e.1	Individually and collaboratively create a simple model of a system (e.g., water cycle, solar system) and explain what the model shows and does not show.
3-5.CT.e.2	Identify the concepts, features, and behaviors illustrated by a simulation (e.g., object motion, weather, ecosystem, predator/prey) and those that were not included.
3-5.CT.e.3	Individually and collaboratively use data from a simulation to answer a question.
